Re: Addition of Buildings I and J to interim status
EPA I.D. Number 007246846

Dear Mr. Trombold:

The Kansas Department of Health and Environment (KDHE) has received your letter of July 26, 1990 clarifying the addition of Buildings I and J as RCRA interim status storage areas at the Hydrocarbon Recyclers facility in Wichita.

We have revised our files to show the addition of these two buildings to the Part A and Part B permit applications. As these buildings have interim status for the storage of regulated quantities of hazardous waste, they will be acceptable for the storage of household hazardous wastes. Therefore, a solid waste transfer permit from KDHE will not be necessary.

You should be aware that as these buildings are going to be included in the facility's permit application, they will be subject to corrective action as implemented by the EPA during the RCRA permitting process. Any questions you may have concerning this matter should be addressed to Mr. Mark Matthews of EPA Region VII. He can be reached at (913) 551-7635.

July 26, 1990

John Paul Goetz, P.E. Chief
Kansas Department of Health and Environment
Hazardous Waste Section
Bureau of Waste Management, Forbes Field
Topeka, Kansas 66620-0001

Dear Mr. Goetz:

Confirming my recent phone conversation with Brenda Clark, I have prepared the following response to your letter dated July 6, 1990.

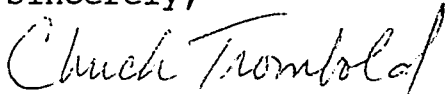

Hydrocarbon Recyclers, Inc. of Wichita (HRI) made notification to KDHE on May 2, 1990 about our intention to permit I and J buildings for hazardous waste storage. We confirmed our intention in writing on May 11, 1990 when we added I and J buildings to our Part A permit. There has been a misunderstanding over these letters and phone conversations with Brenda Clark and comments made during our EPA/SWMU inspection on June 19, 1990.

There is indeed a lease in place with regard to HRI operating these buildings. The only remaining items are the closure plan update and inspection schedule. The closure plan will be updated to include the new storage areas mentioned with our annual review on or around October 1, 1990. The inspection schedules are being modified presently.

In summary, your letter of July 6, 1990 is the result of a misunderstanding. We considered our notification complete and in order. Please note this in your file. Please acknowledge receipt of this letter and concurrence with its contents.

If there are any questions, please call.

Sincerely,

Chuck Trombold
General Manager
